World Map of the Freedom of the Press Status

The Freedom of the Press Status is measured by Freedom House. It measures the level of freedom and editorial independence enjoyed by the press.

Source: Freedom House, Freedom of the Press Status (2017)

The World Press Freedom Index (WPFI) is an annual ranking of countries compiled and published by Reporters Without Borders (RSF) since 2002 based upon the non-governmental organization's own assessment of the countries' press freedom records in the previous year. It intends to reflect the degree of freedom that journalists, news organizations, and netizens have in each country, and the efforts made by authorities to respect this freedom. Reporters Without Borders notes that the WPFI only deals with press freedom and does not measure the quality of journalism in the countries it assesses, nor does it look at human rights violations in general.

2025 World Press Freedom Index

Good: 85–100 points
Satisfactory: 70–85 points
Problematic: 55–70 points
Difficult: 40–55 points
Very serious: <40 points
Not classified

Can you be sure that a video on YouTube has had 900,000,000 viewers? How many are purchased and fake listings?

The psychological factor of having a large number of subscribers. It makes your account appear incredibly popular with others, and this has the effect of encouraging many to subscribe.

This means that too many channel owners become tempted to fudge their figures and artificially boost their numbers.

YouTube hated this, closed the account, and also broke Swedish Law (slander, and false information)

Facebook hate the naked body

CENSORED

Internet censorship can significantly impact a country's development by hindering access to information, limiting free expression, and potentially stifling economic growth and innovation. While some argue that censorship can protect against harmful content or maintain social order, others contend that it undermines democratic values, restricts human rights, and can even exacerbate corruption.

1. Impact on Development:

Economic Growth:

Censorship can impede economic development by restricting access to information, hindering innovation, and discouraging foreign investment.

Social Progress:

Limiting access to diverse perspectives and information can hinder social progress by restricting the free exchange of ideas and limiting the ability of citizens to organize and advocate for change.

Democratic Values:

Censorship undermines democratic values by restricting freedom of speech, assembly, and access to information, all of which are crucial for a healthy democracy.

Corruption:

While some argue that censorship can combat corruption by controlling the spread of information, others contend that it can actually exacerbate corruption by shielding those in power from scrutiny and accountability.

2. **Types of Internet Censorship:**

Content Filtering: Blocking access to specific websites or content based on keywords, IP addresses, or URLs.

Platform Blocking: Restricting access to social media platforms or other communication tools.

Network Shutdowns: Temporarily or permanently shutting down internet access, often during times of political unrest.

Surveillance: Monitoring online activity to identify and suppress dissent.

Self-Censorship: Individuals or organizations censoring themselves to avoid potential repercussions.

3. **Censorship and Circumvention:**

Circumvention Tools: Users often employ tools like VPNs, proxies, and

Tor to bypass censorship and access blocked content.

The "Great Firewall": China's extensive censorship system, known as the "Great Firewall," utilizes a combination of technologies to filter and block content.

"Harmonization": The term used by some in China to refer to internet censorship.

4. **The Global Picture: Freedom on the Net:**

Freedom House's annual report assesses internet freedom in countries around the world, tracking trends in censorship and surveillance.

Web Index:

The World Wide Web Foundation's Web Index measures the web's contribution to social, economic, and political progress, including factors related to censorship.

Global Trends:

Internet freedom has declined (in 14 years) globally in recent years, with governments increasingly using various methods to control online content and activity.

5. **Conclusion:**

Internet censorship presents a complex challenge with significant implications for development. While it can be used to address certain concerns, it also poses risks to human rights, economic growth, and democratic values. Understanding the different forms of censorship and the tools used to circumvent them is crucial for promoting a free and open internet.

**Unveiling the Stones: An Enlightening
Walk Along the Great Wall of China**

China uses about the same technology as Nazi Germany. China is interfering in Sweden's internal affairs.

Nazi Germany pressured Sweden to help them with the extermination project of Jews. This included confiscating property, excluding them from companies, registering and more.

Sweden is urged to do as China thinks

Joseph Goebbels, Reich Minister of Public Enlightenment and Propaganda

China's ambassador to Sweden reprimands Kenneth G. Forslund, chairman of the Foreign Affairs Committee, by letter. China does not like the criticism that it is blackmailing Lithuania into changing its view of Taiwan. Lithuania wants to develop its relations positively with Taiwan. Sweden is protesting against China's methods of interfering in Lithuania's internal affairs and attempts to act with censorship. The same method as in Nazi Germany that pressured Sweden's freedom of expression 1939 -1945.

The Nazis tried to export their idea of exterminating Jews. China exports, among other things, that it has the right to imprison Uguri ethnic groups
